[illegible]
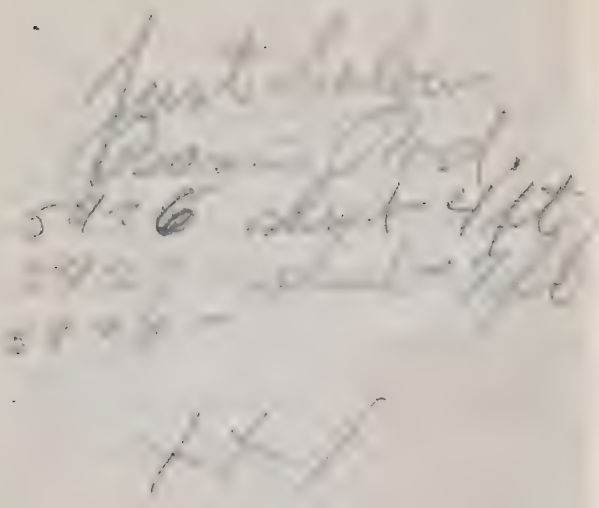
5925 - Brook
with Waterfall
[illegible]



Notes on the blueberries of the Katahdin Region.

V. canadense is by far the most common at the lower elevations; this probably the result of shade tolerance.

V. angustifolium does not begin to be common until the timber line is reached i.e. until there is ample light available.

by the usage of the
Indian Corn
Canadense, an Instance
of the hybrid race
common and formed
from turk with
d. alsiaceum —,
and some varieties
= Kalmia
Laurus etc.
